

ROCKETBOX™

MASONRY SIMPLIFIED

CALEB KING 603.520.1175 TheRocketBox.com

The cement block, reimagined.

ROCKETBOX™ is a lightweight, structural, project ready, masonry unit designed to speed up your veneer project. Unlike the standard CMU, ROCKETBOX™ is ready for stone in minutes!

ROCKETBOX™ is perfect for pros and do-it-yourselfers alike who want columns, firepits, outdoor kitchens, and more.

Suppliers, create a firepit kit that can be installed in a day! Dressing up a porch or entryway with columns? ROCKETBOX™ makes it easy with column wraps and our signature brackets that require no footing.

Depending on project conditions, a concrete footing is not always required. ROCKETBOX™ is rot proof and can be set directly on a compacted base.

We Make Masonry, Faster.
