Eldorado Stone is excited to share the newest additions to our premium manufactured stone veneer product line.

INTRODUCING LOREIOBRICK™

For those looking to make a modern statement with a nod to traditional texture, LoreioBrick translates the simplicity and elegance of historic Roman architecture for contemporary spaces. This long-format brick profile exhibits stunning visual character through its unique linear and slender cuts, which course along the wall to highlight the architectural balance of any space. Although distinctly modern in application, this profile also remains faithful to and reminiscent of some of Europe's most enduring architectural wonders.

AVAILABLE IN **FOUR** COLORWAYS

HOLLIN™

LILIA™

FAROLA™

TALAVERA™

DIMENSIONS: 1.62"H x 20.25"L

This profile can be installed using a drystack technique or a grouted finish.

At just half the height of traditional brick, LoreioBrick provides designers, builders, and architects with a delicate aesthetic to anchor a modern façade and form the visual foundation of homes and buildings with impressive dimensions. From a color perspective, this profile embraces the versatility of neutral gradients and is available in four evocative colorways.

LoreioBrick represents the next evolution in Euro-inspired contemporary style with classic sensibility, offering the flexibility to maximize everything an environment has to offer.

INTRODUCING RIVENWOOD™

Designed to expand upon the artistry and versatility of reclaimed barnwood applications in the modern era, Rivenwood also pays homage to the pioneering craftsmanship of 19th century barn builders along the Atlantic coast. Its rich surface details include authentic characteristics such as nails, breaks and knots, and each piece has been hand selected to embody the captivating combination of both traditional and modern textural touches.

Rivenwood possesses slender cuts and wood grain characteristics that express the unique patina that developed through the aging process of wood, down to the morphing of colors within individual grains through enduring the elements. Textural diversity and intricate imperfections run throughout this panelized profile to emphasize the full history of how this weathered, sawcut wood has found new life in the context of contemporary design.

AVAILABLE IN **THREE** COLORWAYS

SHELTER COVE™

TAWNY BROWN™

SHORE BREEZE™

DIMENSIONS: 4”H x 35.75”L

Rivenwood is available in three color palettes, including an organic grey with flashes of silver and light brown, a rich mature brown with lighter tones peppered throughout, and a fresh and creamy white.
