

SOAKE POOLS

Why Work with Soake® Pools?

Enhance Landscape Design

Soake Pools can be added into almost any backyard design and enhance the outdoor living space. A beautiful small body of water adds a whole new dimension to hardscapes and can provide a destination for gathering in addition to the opportunity for immersion in silky smooth calm water.

Expand Your Offerings

Now you can offer pools to your clients! Soake Pools are precast concrete in a monolithic pour, and come fully tiled and finished on the inside. You simply dig and prep the hole and oversee the setting of the pool. You control the project and complete all the exterior finish work! Add a pool to a bid for a patio or full backyard redesign.

Increase Your Profit

Our landscape partners get qualified leads from us and we work together throughout the project. Partners are free to sell our pools to their own leads as well. Our partners bill an average of \$250,000 for the projects we send them. We are creating experiences and enhancing lifestyles, with a high end product. The Soake Pools name is trusted and recognized throughout the U.S. for over 8 years.

"Soake Pools enhanced our current landscape designs by expanding our offerings. They are easy to work with and we greatly increased our revenue." - Flagship Landworks
