America's Original Plunge Pool

Soake® Pools is a family-owned-and-operated business, located in the heart of New England. Since 2014, we've been manufacturing Soake Pools with an unwavering attention to detail and quality, and the personal touch our customers deserve.

We first fell in love with plunge pools while traveling on vacation, and knew immediately that we wanted to bring this bit of luxury to our home. However, we soon discovered that there was no affordable, high-quality option for plunge pools in our area. So we developed our own manufacturing process, designed to meet the rigors of harsh winter climates.

Today, we proudly offer our revolutionary pre-cast pools to all those seeking the many benefits of plunge pools—and a spa-like experience in their own backyard. We deliver all over the US.

- Karen & Brian Larson, Co-Founders

Beautiful, Customizable Appearance

With their sleek design and materials inspired by nature, Soake Pools blend seamlessly with the beauty of any outdoor space and add a design focal point. Plus, Soake Pools offers a variety of custom tile choices for the inside of your pool, and any exposed outer walls can be finished by local landscaper or pool builder with stone, slate, tile, or any material you choose—for just the look you want.

Soake Pools can be installed at any level: flush with grade, partially raised, or fully above ground.

Calm, Relaxing, Therapeutic Water

Soake Pools provide a calm Zen-like experience. Relax in quiet, hot steamy still water in the winter or chill out in a cold plunge in warmer weather. Think back to the days of The Roman Baths and recreate that same experience right in your own backyard, all year long.

Quick & Easy Installation

Soake Pools are revolutionary, space-saving pools that combine the best of a pool and a hot tub, install in just days, and provide year-round enjoyment.

Our highly engineered pools are precast from the highest quality concrete in one monolithic pour in an NPCA certified plant. They are delivered to your property fully finished on the inside, and ready for quick installation, shortening on-site build time, and saving you time and money.

Year-Round Enjoyment

Soake Pools are cool in the summer and warm in the winter, providing year-round enjoyment. It's like having a pool and hot tub in one! The seasons can be short, especially in the north.

Why not invest in a pool that you can enjoy all twelve months of the year?

Easy Maintenance, Efficiency & Access from Anywhere

Soake Pools' smaller size and limited chemical requirements make them easier and less expensive to maintain, and are the clear environmentally-friendly choice. Variable speed pumps provide efficiency and energy savings. Our insulation package keeps the heat in during cold months, and keeps the heat out during hot weather. Automation provides easy access to your pool's system from anywhere in the world.

Expand Your Living Space to the Outdoors

Transform any size yard into an outdoor living room and spend more time outside. Soake Pools fit into any landscape design, whether it is a large or a small area. Our modest price point consumes less of your budget, leaving more to spend on additional features, like firepits and outdoor kitchens.

Soake Pools Gives Back

We believe we have a social responsibility to give back. Soake Pools donates a portion of every pool sale to Water.org. Water.org is a global nonprofit organization working to bring water and sanitation to the world. Today 785 million people—1 in 9—lack access to safe water at home.

Water.org helps people get access to safe water and sanitation through affordable financing, such as small loans. Their goal is to empower people in need with these life-changing resources—giving women and children hope, communities health, and families a bright future.

Tile We make each pool to order. Select your interior tile. 50+ choices available.

Bench Choose your interior step choice from these elegant options.

Covers We offer three cover choices that meet the ASTM F-1346 safety code.

Size Select the size that fits your needs and design best.
