

**TurfTek**<sup>USA</sup>  
premium synthetic grass provider

# Tough Enough For Every Environment

Look to the recognized industry leader in artificial surfacing to provide the next generation of artificial grass for commercial landscape applications.

## FIBERS

Turf Tek USA utilizes a remarkable, new synthetic fiber, fabricated with a breakthrough polymer process that takes artificial turf to a new level.

## PLYABILITY

Turf Tek USA has achieved a unique pliability within each blade that allows the fibers to bend, twist, compress and bounce back.

## TOTAL SERVICE

At Turf Tek USA, we know what turf will work best for your project and individual needs. Our Total Service will manage everything from surface selection through installation, warranty, and maintenance.

## *What Makes*

# **TURF TEK USA** Synthetic Grass Different?

We offer everything needed from design to installation of a beautiful, maintenance-free landscaping, pet, or sports project. All of our synthetic turf products are manufactured in the USA with peak performance and durability. We have a proprietary installation method using infill that is layered and combined for proper drainage to guarantee a long life in the harsh environment of the Northeast.

**NATIVE** (85 oz.)  
Moderate Traffic

This proprietary blend only offered by Turf Tek is specifically made for the Northeast to be the new benchmark in synthetic landscape turf. Lush height, look & feel.

- Pile Height: 2"
- Pet Friendly
- Our Premiere Option

(45 oz.) **PRO PUTT**

Athletic Tennis Courts

Made from a special blend of fiber, it's specifically designed for superior tennis play.

- Pile Height: 0.75"
- Available in green or clay

# PRODUCT LINE

## LANDSCAPING

### Edge-to-Edge Quality For Your Business

Everything you need for a safe, environmentally friendly, low-maintenance landscaping over every inch of your property.

- Multiple colors & styles
- Patented "Shine Block" to reduce glare
- Reduced allergens
- No chemical fertilizers or insecticides
- Water conservation
- Mud free
- Recyclable, ADA-compliant materials

## PLAYGROUND SAFETY SURFACES

### Safety First On Turf Tek USA Playgrounds

Synthetic grass products are the ideal surfacing for playgrounds, daycare facilities, and community play areas. For play and high-activity areas, injuries can be greatly reduced through the use of the right padding, the right turf, and the right installer; one with extensive impact ratio experience and a thorough understanding of HIC standards. These standards are crucial to ensure the safety of playgrounds, as well as to protect facility operators from liability in case of injuries.

- Meet all Head Impact Code (HIC) Standards
- Meet any fall height ratio rating up to 12 feet
- Maximum drainage
- No chemical fertilizers or insecticides
- Various colors to meet brand and design considerations

## ROOFTOP & COURTYARDS

### A Lawn With A View

Maximize your living area. Our experienced design and installation experts know what works way up there, where there's no room to get it wrong. Your unique challenge is our proudest installation.

- Fire-resistant standards
- Temperature-controlled summer coolness
- Eco-friendly
- No watering
- "Green" terraces, rooftop putting greens, perfect patio parties + more!

## ATHLETIC

### Highest Quality Shock Padding With Non-Toxic Infills

Turf Tek USA's sports fields offer the best speed, pace, and accuracy, allow for multi-directional playability, allow you to play all year long, and are durable. While crumb rubber infill has been synonymous with turf installations, Turf Tek uses quartz sand, which, with the appropriate padding, boasts many benefits that crumb infill does not. Our highest-quality infill combined with G-rated sports field padding, produces a finished product that is ideal for any sports application.

- Lacrosse
- Tennis
- Soccer
- Football

## DOG PARKS & KENNELS

### Safe And Sanitary

Many factors come into play when choosing the best surface for a dog area: safety, drainage, maintenance, and investment to name a few. Turf Tek USA's proprietary installation method combined with state-of-the-art materials yield the ultimate in safe, sanitary pet solutions.

- Mud-free & cleans easily
- Will help reduce ticks & fleas
- Subsurface base system drains moisture quickly, providing a safe, odor-free, mud-free surface!
- Green all year long - no discolored spots
- Prohibits digging
