BOLD

The Product Directory

The best outdoor lighting solution for North American professionals.

Our Founder & CEO

" *At BOLD, we take challenges head-on. We welcome adversity with open arms and turn it into the spark that ignites our drive to succeed. Where some see the impossible, we see opportunity. Whether it's about providing next-level customer service, or thinking outside the box to discover innovative solutions, we are relentless in our pursuit of excellence. We are dedicated to working closely with professionals in our industry and are committed to utilizing their input as inspiration to create a product line that directly addresses the needs of the North American market.* "

RAMON PIETERS

The future is **BOLD**.

STRONG. SMART. FAST.

Cobra Connector

The Cobra Connector is a patent pending connection system designed to make your lighting installations more efficient and secure than ever before. It is made with an improved clamp technology, making it 2x faster to install than other leading connection systems. The metal prongs pierce the jacket of the cable and create an indestructible seal using dielectric grease, shielding it from moisture and other elements. The Cobra Connector is designed with an indicator light to improve troubleshooting throughout your lighting system. The indicator light will shine green once your connection is sealed and secured, making it faster to find the solution when troubleshooting.

FANGS
Constructed from robust electro-plated copper prongs, the Fangs puncture the cable jacket and dispense dielectric grease around the puncture holes, ensuring a completely sealed connection.
CONNECTOR LEAD
Located on the end of the COBRA, connect to the lead of the fixture to the COBRA lead. An o-ring and threaded collar ensures a secure and sealed connection from moisture and dirt.

DOOR
Place your 12/2 cable in the COBRA and close the door to hold the cable in place.

LEVER
Located at the base of the COBRA, simply close the lever to activate the Fangs, piercing the cable and allowing the release of dielectric grease for a reliable and fully sealed connection.

INDICATOR LIGHT
Located on the bottom of the COBRA Connector Lead. Once you connect your fixture to the COBRA, check to make sure the indicator light on the connector lead is green, indicating a secure connection.

We do way more than just look good.

The best customer service in the industry.

Our culture, business priorities, and products reflect our bold approach. Just as important as the products are the people who build them. Our kick-a** team is fueled by passion, curiosity, and innovation. Our dedication, expertise, and purpose drive us to deliver nothing but the best outdoor lighting solutions to our customers.

Designed and developed in North America.

At BOLD, our purpose is to elevate outdoor spaces through modern innovative lighting solutions. Purpose-built alongside BOLD professionals, our cutting-edge portfolio of products has been designed to meet the needs of the North American market and climate. This purpose has guided us as we have evolved from a lighting distributor to a bold leader that is re-defining how to light the outdoors.

Highest quality light output & materials in the industry.

BOLD products are cutting-edge and made of anodized aluminum to withstand the unpredictable harshness of our climate. All our fixtures have virtually the highest light output in the industry (CRI 90+). No fine print. No exceptions. We are committed to pouring thoughtful intention into each product we add to our portfolio. Quality, luxury and excellence are not just our aspirations but our commitments to you.
Success lies in collaboration.

We genuinely care about our BOLD professionals and prioritize addressing your pain points. We continuously improve and evolve our business to stay ahead of the industry. Our commitment to understanding and inspiring professionals to color outside the lines is a big part of what sets us apart and makes us bold- ensuring we deliver lighting solutions that are both inspiring and optimized for the performance, efficiency, and durability that you pursue.

PATH LIGHTING

Effective path lighting is essential for any outdoor space, as it not only adds beauty and functionality but also enhances safety. By illuminating paths, it ensures the safety of guests, highlights variations in elevation, showcases the vibrant and captivating elements of surrounding plants, and offers yet another opportunity to bring depth and dimension to the design of the space when the sun sets.
DAX HIGH

SKU: PL-DAX-H-BK
Voltage: 10 - 15V AC
Wattage: 3
Volt Amps: 4.5
Lumens: 160
Color Temp: 2700K
IP Rating: 65
CRI: 92.5

DAX LOW

SKU: PL-DAX-L-BK
Voltage: 10 - 15V AC
Wattage: 3
Volt Amps: 4.5
Lumens: 160
Color Temp: 2700K
IP Rating: 65
CRI: 92.5

SILO HIGH

SKU: PL-SILO-H-BK
Voltage: 10 - 15V AC
Wattage: 1.5
Volt Amps: 2.5

RECESSED LIGHTING

Recessed lighting is an excellent choice for creating versatile and ambient spaces at night. The sleek functionality of BOLD's recessed fixtures cause no problems to the everyday tasks of mowing the lawn, shoveling snow, or even driving over them with a car if used in a driveway application. By utilizing recessed lighting, you can effectively highlight variations in elevation, structures, and walls, as well as draw attention to focal points in an outdoor space.

Design a **Lighting Plan** in 3 Steps.

Who says you have to light up an entire outdoor space all at once? With the BOLD system, you can take it one step at a time. Whether it's because of the homeowners' preference, budget constraints, or any other factors, easily tap into the BOLD system and add lighting as you go. Start by laying enough cable in the space and then, with time, connect more fixtures. This way, you can illuminate specific areas of the outdoor space gradually, until you've created a dream outdoor living area, both day and night.

STEP **ONE**

Outdoor lighting is not only a practical solution to ensure the safety of an outdoor space at night but also a stylish way to enhance its overall appeal. By strategically placing illuminated fixtures along changes in elevation, pathways, and other high-traffic areas, you create a well-lit environment that feels secure and safe, even in the darkness.
Consider starting with illuminating main pathways. By doing so, you not only provide a clear and visible route, but you also set the foundation for incorporating more lighting elements throughout.

STEP **TWO**

It's important to illuminate the most used areas in the outdoor space. Consider the spots where people naturally come together, socialize, and unwind after a long day. Whether it's a welcoming outdoor kitchen, a cozy seating spot, or a captivating fire area, these places have so much potential for both day and night use.

By making them more functional in the evening, you can create a truly magical atmosphere that will encourage gatherings and make an outdoor space even more enjoyable after the sun sets.
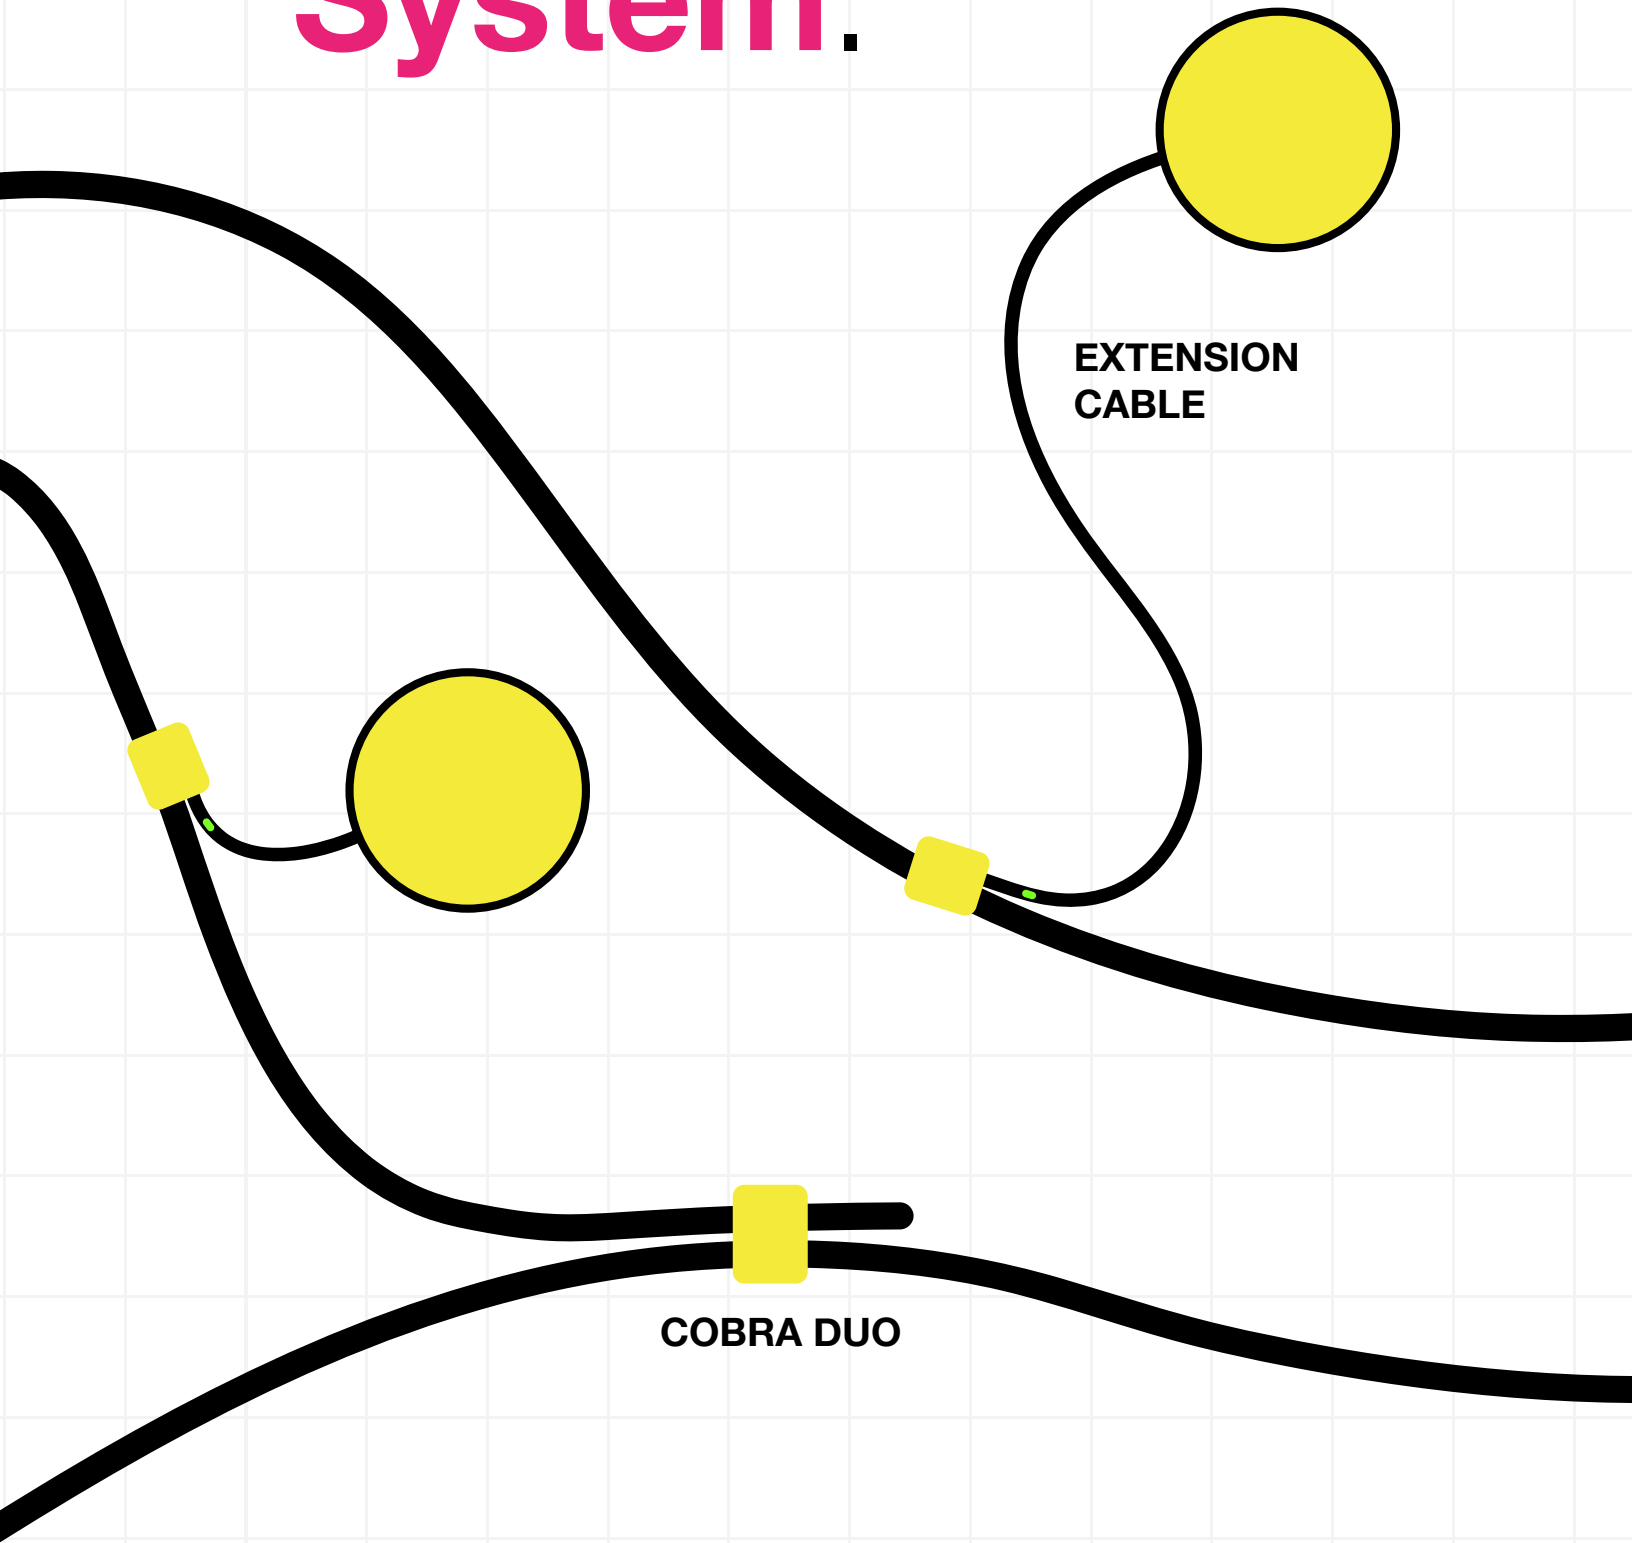

BEFORE

AFTER

STEP THREE

Enhance the beauty of an outdoor living space by incorporating layers and dimension into your lighting plan. Illuminate trees, gardens, privacy fences, and other design elements to bring the space to life and create a captivating experience at night. Adding layers and dimension creates a harmonious ambiance that brings everything together.

Now it's time to fully appreciate the stunning space you've created for your client. You've created an extension of their home that can be enjoyed both day and night! It's important to remember that as the landscape evolves, you may need to adjust the fixtures to ensure proper illumination of the space or object. As time goes on and the landscape grows, you have the flexibility to effortlessly incorporate additional lighting to accommodate for any shifts or growth. This allows you to seamlessly adapt to the natural changes that occur, while still preserving the original vision and feel of the space.
