

NEW!

BAD DOG's own brew combines heat stable wax with natural oils to reduce friction and heat build-up to lengthen the life of all Cutting, Drilling, and Grinding Tools and prevent damage to materials.

Dried Drool CUTTING WAX is a must when working with aluminum and other low-melting point metals.

Use when cutting rebar, trimming flashing, grinding down a old fencepost to install pavers or customizing a metal pergola.

Use when drilling stainless or aluminum for outdoor kitchens or steel supports.
